

Brunhilde – Ultra-High Pressure Water-Jet Robot

Your Advantages with Drain-Jet Robotics[®]:

- Cost-effective process through highly-efficient working method
- Controlled process through camera monitoring
- Protects pipe material, due to ultra-high pressure water-jet technology

Efficient Sewer Rehabilitation with Brunhilde – The Ultra-High Pressure Water-Jet Robot

Special Features:

- Compatible with any Drain-Jet Robotics® system
- Endlessly rotating robot arm
- All-wheel drive
- Speed control for drive and for rotation of the robot arm
- Pressure monitoring of the entire system
- Integrated position sensor
- 48 volt system voltage

Technical Data:

Nominal diameter	DN 150–200
Water pressure	up to 1,500 bar / 21,756 PSI
Amount of water	up to 40 l/min
Length	760 mm
Weight	26 kg
